IMPACT 2026 Faculty Development Program

- **Organized by:** IEDC, Christ College of Engineering (Autonomous), Irinjalakuda.
  In association with: IIITMK, Wadhwani Foundation, Kerala Startup Mission (KSUM), Thrissur Management Association (TMA).
- **Faculty Coordinator:** Aswathy P Sajeev, IEDC CCE Nodal Officer
- **Student Coordinators:** Merin Joy, Antony K C-IEDC Excom
- **Target Audience:**IEDC Nodal Officers, any faculty interested in entrepreneurship thinking and education
- **Date and Venue:** 22–23 June 2026 at Christ College of Engineering (Autonomous), Irinjalakuda, Thrissur, 24-26 June 2026 in online mode
- **Objective:**To empower faculty members with the knowledge, skills, and practical tools required to foster innovation, entrepreneurship, and startup culture within higher education institutions

Introduction

IMPACT 2026 Faculty Development Program was a five day initiative aimed at empowering educators with entrepreneurial thinking, innovation methodologies, and practical strategies for nurturing innovation ecosystems within academic institutions. The program brought together academic leaders, entrepreneurs, industry experts, and ecosystem enablers to share insights on entrepreneurship, product development, business modelling, and innovation-driven education.

Objectives

- Equip faculty members with entrepreneurial and innovation-oriented teaching approaches.
- Introduce frameworks for opportunity discovery, value proposition design, business modelling, MVP validation, go-to-market strategy, and pitching.
- Strengthen collaboration between academia, industry, and innovation support organizations.
- Encourage faculty to mentor student innovators and startups.

Program Highlights

The Faculty Development Program commenced with an inaugural session comprising the invocation, welcome address, presidential address, chief guest address, guest of honour address, felicitations, memento distribution, and vote of thanks. The inauguration was graced by distinguished speakers including **Er.**

(Managing Director, Aquastar Plastic Pvt. Ltd.), **Mr. Gopakumar Vishwanathan** (Regional Head, Wadhwani Foundation), **Mr. Padmakumar C.** (President, Thrissur Management Association), **Mr. Nasif N. M.** (Innovation Lead, Kerala Startup Mission), and **Mr. Sebin Sunny** (IIITM-K).

The technical sessions on **Day 1** were conducted by **Mr. Sebin Sunny** from **IIITM-K** and **Mr. Gopakumar Vishwanathan** from the **Wadhwani Foundation**, covering the Wadhwani Entrepreneurship Platform, problem identification, customer discovery and need validation, solution ideation, competition mapping, startup idea evaluation, and the fundamentals of venture creation. Interactive activities, quizzes, and group discussions enabled participants to apply the concepts in real-world scenarios.

The sessions on **Day 2** were led by **Mr. Ajith P Suresh** from **Bhashini** and **Mr. Nasif N. M.** from **Kerala Startup Mission (KSUM)**. The discussions focused on prototype development, Minimum Viable Product (MVP) creation and validation, business model development, value proposition design, go-to-market strategies, AI-enabled entrepreneurship tools, and effective pitching of business ideas to stakeholders. The program concluded with venture presentations, feedback sessions, and collaborative discussions, equipping faculty members with practical knowledge to foster innovation and entrepreneurship within their institutions.

The online sessions on Day 3 focused on marketing and sales strategies, financial planning, team building, venture scaling, and venture viability presentations, providing participants with practical insights into building sustainable startups. Day 4 continued with venture viability presentations, expert evaluations, and pedagogy demonstration sessions, enabling faculty members to refine both their entrepreneurial ideas and innovation-oriented teaching practices. The final online session on Day 5 featured pedagogy demonstration presentations by participant teams, followed by program wrap-up discussions that emphasized the effective integration of entrepreneurship and innovation into higher education curricula.

Outcomes

- Enhanced faculty awareness of entrepreneurship and innovation practices.
- Improved understanding of startup ecosystem support provided by IIITM-K, Wadhwani Foundation, and KSUM.
- Strengthened industry-academia networking.
- Motivated participants to integrate innovation and entrepreneurship into teaching, mentoring, and institutional activities.

Scope for Improvement

- Increase the duration of the program to allow more in-depth discussions and hands-on activities.
- Provide dedicated networking sessions to facilitate collaboration among faculty members, industry experts, and startup founders.
- Incorporate live demonstrations of successful startup journeys and institutional

AI Thursday-first segment

Event Report

Event Report
AI Thursdays (Session 1:Introduction to Notion)

- **Organized by:** IEDC, Christ College of Engineering (Autonomous), Irinjalakuda
- **Series:** AI Thursdays – Weekly Knowledge Sessions
- **Date and Venue:** 9 July 2026, 3:30–4:30 p.m., IEDC Room, Christ College of Engineering, Irinjalakuda
- **Resource Person:** Emil Shain, IEDC CCO
- **Target Audience:** IEDC EXCOM members

Introduction

The inaugural session of *AI Thursdays* focused on **Notion software** as a dynamic tool for event coordination, documentation, and productivity management. Conducted by Emil Shain, the session introduced participants to the versatility of Notion in organizing tasks, managing projects, and enhancing collaboration.

Objectives

· Familiarize attendees with the core features of Notion.
· Demonstrate practical applications in event coordination, documentation, and meeting management.
· Enable participants to create and customize their own Notion workspace.
· Encourage adoption of AI-powered productivity tools in academic and professional settings.

Program Highlights
The session began with an overview of Notion's capabilities, including:

- Creating **trees, filters, and sorting mechanisms** for structured data.
- Using **real-time to-do lists and task-setting tools**.
- Leveraging Notion for **note-taking during meetings** and collaborative documentation.

Participants engaged in hands-on activities where they:

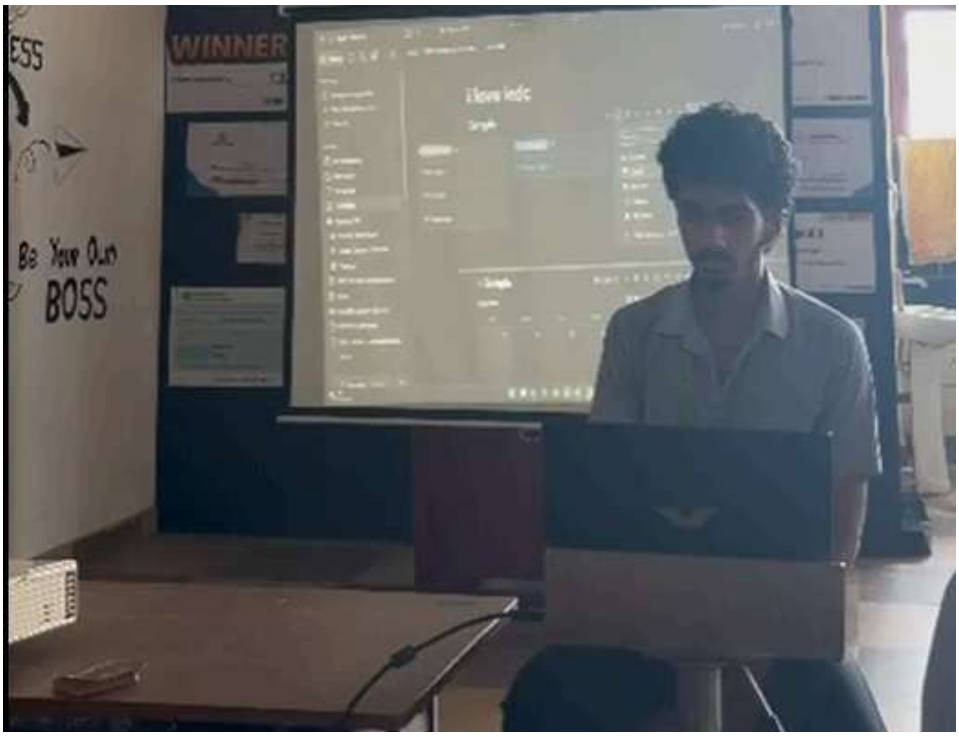

- Created their own **Notion workspace**.
- Built basic elements such as **pages, tables, calendars.**
- Explored customization options to adapt Notion for academic and event-related workflows.

The session concluded with a **feedback round**, where attendees shared their experiences and insights on how Notion could streamline their daily tasks and institutional activities.

Outcomes
· Attendees gained practical exposure to Notion's features.
· Participants successfully created and customized their own workspace.
· Increased awareness of AI-powered productivity tools for academic and event management.
· Positive feedback highlighted Notion's potential for enhancing collaboration and efficiency.

Scope for Improvement
· Extend future sessions to cover advanced integrations (e.g., linking Notion with other apps).
·Assign a small task to be done in the software on their own for hands-on experience.
· Include collaborative exercises to simulate large-scale event coordination.

Event Report
Bead Bracelet Workshop - Curio series - 1

- **Organized by:** IEDC Hobby Hub, Christ College of Engineering (Autonomous), Irinjalakuda.
- **Faculty Coordinator:** Aswathy P Sajeev, IEDC CCE Nodal Officer
- **Student Coordinators:** Ms. Cathrine Shaju, Ms. Devika Rajesh - IEDC Hobby Hub leads
- **Target Audience:** Any student interested in bead bracelet making and marketing hobbies to products
- **Date :** 23rd and 24th July, 2026
- **Venue:** IEDC Room, St.Chavara Block, Christ College of Engineering (Autonomous), Irinjalakuda, Thrissur
- **Resource person/s :** Ms. Raina Shaju, Ms. Maria Shiju
- **Objective:** To foster creativity, develop hands-on bracelet-making skills, and encourage entrepreneurship through handmade accessories.

Introduction

The Beaded Bracelet Workshop was organized by IEDC as part of the CURIO initiative to promote creativity, skill development, and student entrepreneurship. The workshop provided participants with hands-on experience in designing and crafting beaded bracelets while introducing them to the idea of transforming creative hobbies into marketable products. It served as a platform for students to learn, create, and explore entrepreneurial opportunities.

Objectives

- To develop students' creativity and artistic skills through bracelet making.
- To provide practical training in designing and crafting beaded bracelets.
- To encourage students to explore handmade products as a potential source of income.
- To introduce participants to the basics of product branding, pricing, and marketing.
- To promote entrepreneurship by connecting creative skills with business opportunities through CURIO.

Program Highlights

- The session on both days began with an introduction to the CURIO initiative and its vision.
- Participants were introduced to different types of beads, threads, charms, and bracelet-making techniques.
- A live demonstration was conducted, followed by a hands-on session where participants designed and created their own bracelets.
- Guidance was provided on colour combinations, finishing techniques, and product presentation.
- Participants learned basic marketing strategies, branding, and pricing methods for handmade products from resource person Raina Shaju, jewellery business entrepreneur on day 1 and Maria Shiju, Chief Marketing Officer, IEDC on day 2
- The workshop concluded with an interactive session where participants showcased their creations and discussed ideas for selling them through the CURIO platform.

Outcomes

- Participants gained practical skills in beaded bracelet making, including bead selection, colour coordination, and finishing techniques.
- Enhanced creativity, craftsmanship, and confidence through hands-on product creation.
- Developed basic knowledge of product branding, pricing, and marketing for handmade accessories.
- Encouraged entrepreneurial thinking by exploring opportunities to sell handmade products through CURIO.
- Promoted collaboration, creativity, and self-employment opportunities among students.
- Contributed to UN SDG 8 – Decent Work and Economic Growth by encouraging entrepreneurship and income-generating skills.

Event Report
Friendship Day Bracelet Stall

- **Organized by:** IEDC, Christ College of Engineering (Autonomous), Irinjalakuda.
- **Faculty Coordinator:** Aswathy P Sajeev, IEDC CCE Nodal Officer
- **Student Coordinators:** Ms Devika Rajesh, Ms Cathrine Shaju
- **Target Audience:** Students , teachers ,etc
- **Date and Venue : 29 July 2026,** In front of Cake Farm Cafe , Chavara block, Christ College of Engineering (Autonomous), Irinjalakuda, Thrissur
- **Objective:** To provide students with an opportunity to showcase their creativity and entrepreneurial skills by designing and selling handmade bracelets.

Introduction

The Friendship Day Bracelet Stall was organized to celebrate the spirit of friendship through handmade bracelets created by students to gift their friends. It provided students with an opportunity to showcase their creativity, share meaningful friendship-themed gifts, and encourage student participation and entrepreneurship.

Objectives

1. Promote Student Creativity: Provide students with an opportunity to design and create handmade Friendship Day bracelets.
2. Encourage Entrepreneurship: Give students practical experience in selling and promoting student-made products.
3. Celebrate Friendship: Create a fun and meaningful way for students to express appreciation for their friends.
4. Develop Skills: Enhance students' skills in creativity, teamwork, communication, and basic business management.
5. Encourage Student Participation: Provide an engaging platform for students to actively participate in a campus activity.

Program Highlights

The stall was set up on Friendship day in order to sell the beaded bracelets to students and faculty in our college. The bracelets were made by participants of Beaded bracelet workshop conducted by IEDC Hobby Hub on 23rd and 24h of August. Marketing and sales was also done through instagram page of Curio by Hobby hub. The event saw overwhelming response from students, engaging in games set up in the stall and also the bracelets displayed for sale. The bracelets

were sold successfully, with sales exceeding our expectations. It was a wonderful way to conclude the Friendship Day stall.

Outcomes

- **Skill Enhancement:** Students improved their creativity, teamwork, communication, marketing, and basic sales-management skills through the planning and operation of the stall.
- **Career Preparedness:** The activity provided practical exposure to entrepreneurship, product presentation, customer interaction, and small-scale business management.
- **PO8** – Ethics: Encouraged responsible and fair interaction with customers.
- **PO9** – Individual and Team Work: Promoted teamwork and coordination among student organizers.
- **PO1**0 – Communication: Developed communication and customer-handling skills.
- **PO12** – Life-long Learning: Encouraged creativity, initiative, and entrepreneurial thinking.
- **Sustainable Development Goals (SDGs)** :SDG 4 – Quality Education: Promoted experiential learning and practical skill development.

Event Report

Event Report
Git'n'Github

- **Organized by:** IEDC, Christ College of Engineering (Autonomous), Irinjalakuda.
- **Faculty Coordinator:** Aswathy P Sajeev, IEDC CCE Nodal Officer
- **Student Coordinators:** Dibin Shaju, Bharath krishna A B and Antony K C
- **Target Audience:** College students with little to no prior experience in version control or GitHub — particularly beginners from computer science and related technical backgrounds who wanted to learn the basics of Git and GitHub for academic projects and collaborative coding.
- **Date:** 11 August 2026
- **Venue:** IEDC room, St chavara block, Christ College of Engineering (Autonomous), Irinjalakuda, Thrissur
- **Objective:** To introduce students to the fundamentals of Git and GitHub, and help them understand version control concepts through hands-on practice. The workshop aimed to enable participants to create repositories, track changes, and perform basic Git operations (init, add, commit, push, pull, clone) so they could confidently use GitHub for their academic and personal coding projects.

Introduction

As part of our initiative to help students build practical technical skills, we organized a 1-hour GitHub workshop covering the basics of version control. The session was designed for students with little to no prior experience with Git or GitHub, and focused on hands-on learning of essential commands used in everyday development workflows.

Objectives

The workshop was designed with the following specific goals in mind:

- **Introduce version control concepts** – Help students understand what version control is and why it's essential in software development.
- **Familiarize students with Git basics** – Teach core commands such as `git init`, `git add`, `git commit`, `git status`, and `git log`.
- **Demonstrate GitHub as a collaboration platform** – Show how to create repositories, push/pull code, and work with remote repositories.
- **Enable hands-on practice** – Let students execute basic Git/GitHub commands themselves during the session to build confidence.
- **Encourage adoption for academic projects** – Motivate students to use GitHub for managing their own coding assignments, projects, and team collaborations.
- **Build a foundation for future learning** – Prepare students to explore more advanced Git concepts (branching, merging, pull requests) on their own.

Program Highlights

The workshop began with a brief introduction to version control systems and why tools like Git and GitHub are essential for modern software development. Participants were then walked through core Git commands including init, add, commit, status, and log, with live demonstrations on the terminal. Students followed along on their own systems, creating their first local repository and making sample commits to understand the workflow in practice.

In the latter half of the session, the focus shifted to GitHub as a collaboration platform. Students learned how to create a repository on GitHub, connect it to their local project, and use push, pull, and clone commands to sync changes. The session wrapped up with a short Q&A, where participants asked questions about real-world use cases, and volunteers shared tips for using GitHub in academic and personal projects.

Outcomes

- Positive Feedback: Students responded enthusiastically to the hands-on format, with many appreciating the simplified, beginner-friendly explanation of Git and GitHub concepts that are often considered intimidating for first-time learners.
- Skill Enhancement: Participants gained practical, working knowledge of essential Git commands and GitHub workflows, moving from zero prior experience to being able to independently create repositories, track changes, and push code to GitHub.
- Career Preparedness: Students recognized GitHub as a widely-used industry tool and understood its relevance for internships, job applications, and collaborative software projects, giving them a head start in building an industry-relevant skill set.

Program Outcomes (POs) Addressed

- PO1: Ability to apply foundational technical knowledge to practical tools used in the industry
- PO5: Modern tool usage — ability to use current techniques and tools relevant to computer science practice
- PO9: Ability to function effectively as part of a team/collaborative environment (through GitHub's collaboration features)
- PO12: Recognition of the need for and engagement in independent, lifelong learning of new technologies

Sustainable Development Goals (SDGs) Addressed

- SDG 4 – Quality Education: Provided free, accessible technical education to enhance students' skill sets outside the regular curriculum.

- SDG 8 – Decent Work and Economic Growth: Equipped students with an industry-relevant skill that improves employability and workforce readiness.
- SDG 9 – Industry, Innovation and Infrastructure: Encouraged adoption of modern development tools that support innovation and collaborative technical work.

Outcomes

- **Positive Feedback:** Students responded enthusiastically to the hands-on format, with many appreciating the simplified, beginner-friendly explanation of Git and GitHub concepts that are often considered intimidating for first-time learners.
- **Skill Enhancement:** Participants gained practical, working knowledge of essential Git commands and GitHub workflows, moving from zero prior experience to being able to independently create repositories, track changes, and push code to GitHub.
- **Career Preparedness:** Students recognized GitHub as a widely-used industry tool and understood its relevance for internships, job applications, and collaborative software projects, giving them a head start in building an industry-relevant skill set.

Scope for Improvement

- Extended duration: A slightly longer session (e.g., 1.5–2 hours) could allow more time for hands-on practice and troubleshooting individual doubts.
- Pre-workshop setup guide: Sharing a simple Git/GitHub installation and setup guide in advance could help save time during the session and ensure all participants start at the same pace.
- Follow-up resources: Providing a curated list of practice exercises or beginner-friendly repositories after the workshop could help students reinforce what they learned.
- Smaller group activities: Introducing short paired or small-group exercises could encourage more peer learning and hands-on collaboration during the session.
- Feedback-based advanced session: Based on interest, a follow-up session on intermediate topics like branching and pull requests could be considered to build on this foundation.

PIPE CLEANER
FLOWER MAKING WORKSHOP

- **Organized by:** IEDC, Christ College of Engineering (Autonomous), Irinjalakuda.
  In association with:nil
- **Faculty Coordinator:** Aswathy P Sajeev, IEDC CCE Nodal Officer
- **Student Coordinators:** Ms. Jisna Justin, Ms. Caroline Shaju
- **Target Audience:** Students interested in creative hobbies and handicraft activities.
- **Date and Venue:** 13 August 2026 (Thursday), 2:30 PM – 4:30 PM, St. Thomas Hall, Christ College of Engineering (Autonomous), Irinjalakuda, Thrissur
- **Objective:** To provide students with a creative and practical skill in pipe cleaner flower making while introducing them to its potential as a small-scale income-generating activity.

Introduction

CURIO, an initiative under the IEDC Hobby Hub of Christ College of Engineering (Autonomous), Irinjalakuda, organized a Pipe Cleaner Flower Making Workshop on 13 August 2026. The workshop provided students with a hands-on opportunity to learn the art of creating decorative flowers using pipe cleaners. Along with creativity and skill development, the programme introduced an entrepreneurial perspective through its theme, “CREATE • LEARN • EARN.” Participants were encouraged to explore how a simple creative hobby could be developed into a potential source of income through handmade products.

Objectives

1. - To introduce students to the basic techniques of pipe cleaner flower making.
2. - To encourage creativity and artistic expression through hands-on learning.
3. - To develop a practical and enjoyable hobby using simple materials.
4. - To enhance participants’ ability to create handmade decorative products.
5. - To introduce the entrepreneurial potential of creative and handmade products.
6. - To encourage students to explore hobbies as possible income-generating skills.

Program Highlights

The one-day workshop was conducted at St. Thomas Hall from 2:30 PM to 4:30 PM. Participants were introduced to the materials and basic techniques required for making pipe cleaner flowers. The session was conducted in an interactive and hands-on manner, allowing participants to learn the process and create their own floral designs with guidance from the team.

A major highlight of the programme was the “CREATE • LEARN • EARN” concept. Participants were not only taught a creative skill but were also given an opportunity to understand its entrepreneurial potential. The programme offered participants 40% of the profit from the sale of the products they created, connecting skill development with practical earning opportunities.

The workshop received an enthusiastic response from students, and registrations were reopened due to the high demand and requests from interested participants. The completed flowers and floral arrangements showcased the creativity and skills developed during the session.

Outcomes

Positive Feedback:

- - The workshop received an enthusiastic response from participating students.
- - Participants appreciated the opportunity to learn a new and creative skill through a practical session.
- - The interactive nature of the workshop encouraged active participation and collaboration.

Skill Enhancement:

- - Developed basic skills in pipe cleaner flower making and floral arrangement.
- - Improved creativity, patience, precision, and attention to detail.
- - Enabled participants to create attractive handmade products independently.
- - Provided practical exposure to product-making using simple craft materials.

Career Preparedness:

- - Introduced students to the entrepreneurial potential of handmade products.
- - Connected creative skill development with a practical earning opportunity.
- - Encouraged participants to explore hobby-based skills as possible sources of supplementary income.
- - Created awareness about transforming creative ideas into marketable products.

Program Outcomes (POs) Addressed

- - PO3 – Design/Development of Solutions: Encouraged participants to develop creative designs and handmade products.
- - PO5 – Modern Tool Usage: Provided practical experience in using appropriate materials and tools for product creation.
- - PO9 – Individual and Team Work: Encouraged collaboration and interaction among participants during the workshop.
- - PO10 – Communication: Promoted communication and exchange of ideas between participants and coordinators.
- - PO12 – Life-long Learning: Encouraged students to acquire and continue developing creative skills beyond the classroom.

Sustainable Development Goals (SDGs) Addressed

- - SDG 4 – Quality Education: Promoted experiential and skill-based learning through a practical workshop.
- - SDG 8 – Decent Work and Economic Growth: Connected creative skill development with entrepreneurship and potential income generation.

Scope for Improvement

- Provide reference materials or tutorials for participants to continue practising after the workshop.
- Since St. Thomas Hall does not have ceiling fans or air conditioning, providing portable/table fans during future workshops could improve ventilation and participant comfort, especially during longer hands-on sessions.

Event Report

Event Report

KICKSTART

- **Organized by:** IEDC, Christ College of Engineering (Autonomous), Irinjalakuda.
- **Faculty Coordinator:** Aswathy P Sajeev, IEDC CCE Nodal Officer
- **Student Coordinators:** Bharath Krishna A B
- **Target Audience:** First Year Students
- **Date and Venue:** Christ Hall, St. Marys, Christ College of Engineering (Autonomous), Irinjalakuda, Thrissur
- **Objective:** IEDC Orientation for first years

Introduction

Kickstart was an orientation program organised by IEDC CCE for first-year students on **14th, 18th and 19th August** at **Christ Hall**. It introduced newcomers to the Innovation and Entrepreneurship Development Centre, its activities and its community, and helped them settle into campus life. The first-year batch was divided into five sessions across the three days. Within each session, students were split into two divisions, with teams of 5 to 6 members in each. They took part in a college-wide treasure hunt and icebreaker games followed by talk session of IEDC ExCom and Ex-ExCom members.

Objectives

1. **Introduce IEDC CCE:** Give first years a clear picture of what IEDC does, including its events, hackathons, workshops and startup support, and how they can get involved.
2. **Learn from seniors' experiences:** Let students hear real stories, lessons and tips from seniors who have already been through the journey, so they know what to expect and how to make the most of their college years.
3. **Familiarise students with the campus:** Help first years discover key departments and facilities through a college-wide treasure hunt.
4. **Break the ice:** Build comfort and friendships among first years through fun, low-pressure games.
5. **Encourage teamwork and participation:** Motivate students to collaborate and communicate through small team-based activities in groups of 5 to 6, and to take part in future IEDC initiatives.

Program Highlights

Day 1 (14th August), Sessions 1 and 2: Two batches of first years took part, one after the other. Each session began at Christ Hall, where students were divided into teams of 5 to 6 members and split into two divisions. One division set out on a treasure hunt across the campus, solving clues and completing small challenges at different locations. The other division took part in fun icebreaker games and then vice-versa. Once the treasure hunt and game session was complete for both divisions, students came together in the IEDC room for a talk session.

Day 2 (18th August), Session 3: A single batch took part in the full program, following the same flow of treasure hunt, games and talk session. With only one session that day, the seniors and volunteers could give the group more attention and spend more time on questions and discussion in the IEDC room.

Day 3 (19th August), Sessions 4 and 5: The final two batches went through the same program, completing the orientation for all first years. In the talk session, seniors introduced IEDC CCE, its vision and activities, and shared their own experiences with projects, hackathons and learning curves. Students asked questions about getting started and balancing academics with extracurriculars.

Outcomes

- **Positive Feedback:** First years enjoyed the mix of treasure hunt, games and talk session, and found the seniors approachable and the sessions well organised.
- **Skill Enhancement:** Working in teams of 5 to 6 helped students practise teamwork, communication, problem-solving and quick decision-making during the treasure hunt and games.
- **Career Preparedness:** The talk session exposed students to hackathons, projects and the innovation ecosystem, and showed them how to build skills and find opportunities from the first year.
- **Community Building:** Students connected with seniors and peers, forming early friendships and a support network within IEDC CCE.
- **Campus Familiarity:** The college-wide treasure hunt helped first years locate key departments and facilities.
- **Awareness of IEDC:** Students learned about IEDC CCE's vision and activities and how to join future events and workshops.

Program Outcomes (POs) addressed

- **PO9:** Individual and team work
- **PO10:** Communication
- **PO12:** Life-long learning

Sustainable Development Goals (SDGs) addressed

- **SDG 4:** Quality Education
- **SDG 9:** Industry, Innovation and Infrastructure
- **SDG 17:** Partnerships for the Goals

Scope for Improvement

- **Allow more time per session:** A slightly longer slot for each session would let the treasure hunt, games and talk session run at a relaxed pace, with more room for seniors' stories and student questions.
- **Add short buffers between activities:** A few minutes between the treasure hunt, games and talk session would make transitions smoother and give teams time to regroup and settle in.

Event Report

- **Organized by:** IEDC, Christ College of Engineering (Autonomous), Irinjalakuda.
- **Faculty Coordinator:** Aswathy P Sajeev, IEDC CCE Nodal Officer
- **Student Coordinators:** Ms Lakshmi Anoop**,** Ms Maria Shiju
- **Target Audience:** Students and Faculties of Christ College of engineering **.**
- **Date and Venue:** St Thomas Hall, Chavara Block, Christ College of Engineering (Autonomous), Irinjalakuda, Thrissur
- **Objective:** A creative Onam celebration that promotes entrepreneurship by empowering Mehendi artists with a platform to showcase their talent, serve customers, and earn.

Introduction

The *CURIO "ഒന്ന് മെഹന്ദിയിടൂ ഇട്ടേച്ചും "* was organised by the IEDC Hobby Hub as part of the Onam celebrations at Christ College of Engineering. The initiative aimed to provide talented Mehendi artists with a platform to showcase their creativity and skills while earning from their artwork. Through this event, participants were encouraged to express their artistic talents, engage with the campus community, and contribute to the festive spirit of Onam.

Objectives

- Provide a platform for aspiring Mehendi artists to showcase and develop their artistic skills.
- Encourage creativity and self-expression by allowing participants to experiment with different Mehendi styles and designs.
- Create an opportunity to earn from their talent by offering artists 50% of the revenue generated through their Mehendi work.
- Promote student participation and entrepreneurship by connecting creative skills with a practical earning opportunity.
- Contribute to the Onam celebrations by adding a traditional and artistic element to the campus festivities.
- Build a creative community where students with similar interests can connect, collaborate, and share their talents.

Program Highlights

The *CURIO Mehendi Artist Event* was conducted from **12:00 PM to 3:30 PM**, witnessing enthusiastic participation from both **students and faculty members**. The event received an overwhelming response, with **11 pre-registrations and 50+ spot registrations**. Due to the high demand and over-spot registration, the registrations had to be closed by **2:30 PM**, making the event a remarkable success.

A total of **15 Mehendi artists** actively participated and showcased their creativity throughout the event. All the necessary materials required for Mehendi application were provided to the artists, ensuring a smooth and comfortable experience. **Refreshments were also provided three times** during the event. The enthusiastic participation, positive response, and vibrant atmosphere made the event a **huge success** and a memorable part of the Onam celebrations.

Outcomes

- **Positive Feedback:** The event received an overwhelming response from both students and faculty, with **50+ spot registrations** in addition to 11 pre-registrations. The high participation and early closure of registrations reflected the strong interest and positive reception of the initiative.
- **Skill Enhancement:** The participating **15 Mehendi artists** had an opportunity to showcase their artistic abilities, experiment with different designs, and improve their confidence through real-time interaction with participants.
- **Entrepreneurial Exposure:** The event demonstrated how creative skills can be transformed into an income-generating opportunity, encouraging students to explore entrepreneurship through their talents.
- **Community Engagement:** The event brought together students, faculty, and artists, creating an engaging and collaborative environment while adding a creative element to the Onam celebrations.
- **Career Preparedness:** By providing artists with practical experience in handling customers, managing time, presenting their work, and working in an event environment, the program helped develop skills relevant to future creative and entrepreneurial pursuits.

Program Outcomes (POs) Addressed

- **PO5 – Modern Tool Usage:** Effective use of Mehendi tools and materials to create artistic designs.
- **PO8 – Ethics:** Encouraged professionalism, responsibility, and respectful interaction with participants.
- **PO9 – Individual and Team Work:** Promoted collaboration among Mehendi

artists and event coordinators.

- **PO10 – Communication:** Enhanced communication and interpersonal skills through interaction with students and faculty.
- **PO12 – Life-long Learning:** Encouraged participants to develop and continuously explore their creative skills.

Sustainable Development Goals (SDGs) Addressed

- **SDG 4 – Quality Education:** Promoted informal learning and skill development beyond the classroom.
- **SDG 8 – Decent Work and Economic Growth:** Encouraged creative entrepreneurship and provided an opportunity for artists to earn from their skills.
- **SDG 10 – Reduced Inequalities:** Created an inclusive platform where individuals could participate and showcase their talents irrespective of their academic background.
- **SDG 17 – Partnerships for the Goals:** Encouraged collaboration among students, faculty, artists, and event organisers.

Scope for Improvement

- **Market Research & Pricing:** The pricing of the Mehendi services could have been planned more strategically. Since the amount charged was relatively low, the 50% revenue share resulted in a smaller earning for the artists. For future events, it is important to conduct proper **market research and competitor price analysis** beforehand to understand the prevailing rates and set prices that are both reasonable for participants and beneficial for the artists.
- **Better Preparation for Spot Registrations:** Although the event received an unexpectedly high response, the team was not fully prepared to handle such a large number of spot registrations. The sudden increase in participants created some last-minute pressure and coordination challenges. Future events should include a **contingency plan, additional registration resources, and clearly defined roles** to efficiently manage unexpected crowds.
- **Capacity & Resource Planning:** Based on the overwhelming response, future editions can consider preparing additional materials, refreshments, volunteers, and registration arrangements in advance. This would help the team manage high participation smoothly while maintaining the quality of the event experience.

Event Report
Teachers' Day

- **Organized by:** IEDC, Christ College of Engineering (Autonomous), Irinjalakuda.
- **Faculty Coordinator:** Aswathy P Sajeev, IEDC CCE Nodal Officer
- **Student Coordinators :** Ms. Dilna Ditto
- **Target Audience :** CCE Faculty and staff
- **Date and Venue:** 5 September 2026, All Staffrooms, Christ College of Engineering (Autonomous), Irinjalakuda, Thrissur
- **Objective:** To express gratitude and appreciation to the faculty through creative, handmade Teachers' Day gifts while promoting creativity, teamwork, and entrepreneurial thinking among students.

Introduction

Teachers' Day was organized by IEDC as a creative initiative to express gratitude and appreciation towards the faculty members. As part of the celebration, handmade pipe-cleaner flowers were prepared by the team and presented to the faculty. Special bouquets were given to the Principal, Vice Principal, and other key authorities, while individual handmade flowers along with Teachers' Day cards were presented to the teachers. The event provided an opportunity to combine creativity, teamwork, and appreciation in a meaningful way.

Objectives

To express gratitude and appreciation to teachers for their contribution to students.
To encourage creativity through handmade craft activities.
To promote teamwork, coordination, and responsibility among student volunteers.

Program Highlights

The team planned the Teachers' Day celebration, finalized the gift ideas, divided responsibilities, and arranged the required materials for creating pipe-cleaner flowers and artworks. Students prepared handmade pipe-cleaner flowers, small artworks, and Teachers' Day cards. Special bouquets were also prepared for the Principal, Vice Principal, and other key authorities. The handmade flowers and cards were presented to the faculty members. The event focused on expressing gratitude and creating a memorable experience for the teachers through personalized handmade gifts.

Outcomes

- Positive Feedback: Received positive responses from faculty members for the thoughtful and handmade gifts.

- Skill Enhancement: Improved creativity, teamwork, communication, planning, and event coordination skills among student volunteers.
- Career Preparedness: Provided practical experience in planning, organizing, coordinating, and executing a student-led event.
